## From UW Aviation Students

### Ashley Gellatly

4th Year Geography and Aviation Student

"This program made studying for the INRAT so easy. I was overwhelmed with the material at first but progressing through the program really made it easy to not worry about the material that isn't as important and focus on what is important. Dean and Jason are incredibly helpful, and they put their hearts into being the best instructors they can be. I'm so glad I heard of this program, and highly recommend it to anyone studying for the INRAT!"

### Garett Maddick

4th Year Geography and Aviation Student

"I can't say enough great things about INRAT exam prep! Thanks to Dean and Jason I was able to breeze through my INRAT with more than just a passing mark. This course is very well organized as it goes over all of the key study areas for the INRAT, but also provides examples and tips to how these concepts can be applied to your actual IFR training which I found very beneficial. A major aspect that sets apart this course from the rest is its interactiveness. They are very flexible and really do care about making sure you succeed. By far the best customer experience I have ever had."

## **Blake Puzon**

4th Year Science and Aviation Student

“Just wanted to leave a huge shoutout to Jason and Dean for this amazing course! The content is really well organized, breaking concepts down into useful examples and practice questions. The discussions board feature is also fantastic, and I had my questions answered promptly. I really can’t recommend this course enough!”

## **Melanie Heins**

4th Year Science and Aviation Student

“I absolutely loved the INRAT Exam Prep program. I think it was helpful that the program started with basic concepts and worked its way into detail so you truly understood the theories and did not miss any steps along the way. The quizzes reflected similar questions that were on the TC exams and I think it truly prepared me for my INRAT exam. I personally am someone who generally does not do well on TC exams, however the INRAT was the first exam that I felt ready for and it's all thanks to this course. I should also mention Dean and Jason are super knowledgeable and do an amazing job at addressing any questions or confusions that you may have. They put so much effort into this course by making sure that you are confident and ready to write your exam and will even schedule zoom conference calls to go over important concepts with you before your exam. I will also say that I wrote my ATPL exams soon after taking the course (after writing my INRAT) and this program even helped with some of the concepts on the SAMRA/SARON! 10/10 would recommend!!!”
